About me

I am a current Macquarie University student studying Cybersecurity and I want to get a job in IT to gain critical experience to eventually become a skilled blue team and defensive Cybersecurity expert. I left my senior year of high school to pursue my certificates in Information Technology at TAFE and worked part-time at a Woolworths near me but had to leave my hometown to study my Certificate IV in Cyber Security. I am extremely passionate about technology and spend lots of my free time developing my skills in computer software and hardware and enjoy when I am able to make or fix computer systems.

Career history

Team Member at Woolworths Supermarkets

Sep 2023 – Jul 2024

My key responsibilities were to be at the front of the store working the checkout or supervising the self-checkout area assisting customers with questions and processing of orders. I also took the opportunity to assist other departments when short-staffed restocking shelves, rotating and replenishing cold stock items.

Key responsibilities

- Customer service
- Maintaining presentation standards
- Cash handling
- Stock rotation

Achievements

- Grew team-based skills and communication
 - Gained experience in customer service
-
